

# Methodology for FL-511 - Pensacola/Escambia, Santa Rosa Counties CoC

## Sheltered Population Total

**1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).**

HMIS Data	57%
Provider-level surveys	26%
Client-level surveys	17%
Observation	0%
Other	0%
<b>Total</b>	<b>100%</b>

**2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?**

- Non-random sample and extrapolation

**3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?**

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

## Sheltered Subpopulation

**4. What data source(s) was used to produce the demographic and subpopulation data included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? (select all that were used)**

- HMIS Data
- Provider-level surveys

- Client-level surveys

**5. Was the CoC able to collect information about the demographic and subpopulation characteristics of all sheltered people or only some?**

- A subset of sheltered people

**5a. How did the CoC select the subset of people?**

- Sheltered people were not selected randomly, and the selection was driven by convenience or expediency (e.g., people that were willing to provide information)

**5b. Did the CoC adjust the information in some way (e.g., statistical adjustment or extrapolation) to account for all sheltered people?**

No

**6. Looking at the change in your sheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below.**

- Change in participation of programs serving general homeless populations (e.g., singles, families)
- More volunteers for PIT count
- Change in emergency shelter capacity
- Change in transitional housing capacity

**Please provide a brief description of these specific factors (500 word limit):**

Waterfront Rescue Mission reduced its staff and shelter bed capacity by 45% due to the economy. This impacted their emergency shelter and transitional housing projects.

## **Unsheltered Population**

**7. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count. (select all that were used)**

- "Night of the count" - known locations

- HMIS

**7a. Were certain areas within the CoC geography specifically excluded because the CoC had reason to believe there were no unsheltered people in those areas?**

No

**7c. In areas that were canvassed, did the CoC count all unsheltered people in those areas or a sample of people?**

- All people encountered during the count

**8. What information or method(s) was used to de-duplicate the total count of people in the unsheltered population? (Check all that apply)**

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)
- Other: Hyperion App was utilized which improved the timeliness and accuracy of data as well as GS mapping where the survey took place.

## Unsheltered Subpopulations

### **9. What approach(es) was used to collect demographic and subpopulation data about unsheltered people included in the unsheltered population during the PIT count?**

- Surveys/interviews of people identified as unsheltered on the night of the PIT count
- Surveys/interviews of people identified as unsheltered on the night of the count, but completed at a later date
- Surveys/interviews of people identified within 7 days following the night of the PIT count night who may have been unsheltered on the night of the PIT count (e.g., “service-based” surveys at locations where people who are homeless go for assistance)
  
- Other:

### **10. Were all people who were encountered during canvassing on the night of the count or during post night of the count PIT activities asked to complete a survey/interview?**

- All people encountered were surveyed

### **11. What information or method(s) was used to produce an unduplicated total count of homeless people across your sheltered and unsheltered populations?**

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

### **12. Looking at the change in your unsheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below**

- More volunteers for PIT count
- Change in emergency shelter capacity
- Change in transitional housing capacity
- Change in rapid re-housing capacity
- Impact of coordinated entry

- HMIS data from street outreach and/or other providers

Hyperion App was utilized which improved the timeliness and accuracy of data as well as GS mapping where the survey took place.

**Please provide a brief description of these specific factors (500 word limit):**

Due to the impact of Coordinated Entry, the CoC was able to extend Rapid Rehousing capacity despite the loss of shelter beds. Also, the CoC increased our geographic coverage through the use of the Hyperion App to collect surveys in our more rural communities in Santa Rosa and Escambia Counties. Further, we deployed trained street outreach teams to area encampments.
